

Advanced Analytics

Uncover opportunities in your data

Advanced Analytics empowers shippers of all sizes to optimize freight activity and minimize risks.

- **Shipment Summary:** Access insights in your shipping behavior like overall shipping activity and transit time.
- **Carrier Summary:** Make the most of your carrier relationships by understanding your freight and volume trends.
- **Lane Analysis:** Maximize efficiency with reports that help you determine peaks in shipping trends and the best times of the day and week to ship.

Advanced Analytics enables you to:

Spot shipping and freight trends

Use your data to identify inefficiencies and reduce transit time. Dig deeper into pickup and delivery data to optimize your warehouse operations.

Improve communication with your carriers

Become the shipper of choice by understanding your carrier and freight trends. Use this data to properly communicate with carriers and add efficiency for both parties.

Optimize lanes and locations

Use this dashboard to optimize freight volume and ensure you're adequately staffed for whatever comes your way.
