

MyTruckload

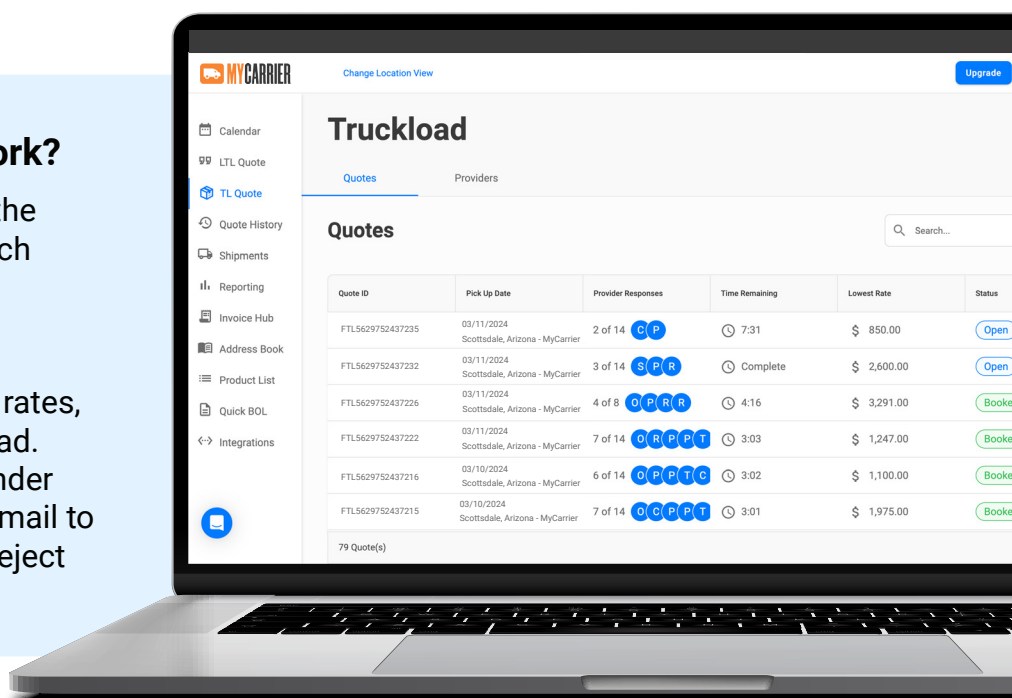

Streamline your entire quote-to-dispatch
booking flow in one platform

MyTruckload streamlines your truckload quoting process, allowing you to integrate your Truckload providers directly into our system. You can request quotes and enjoy the same ease and efficiency you have within your LTL booking flow.

How Does MyTruckload Work?

To request a new quote, fill out the shipment details and select which provider(s) to send a request to.

Your providers receive an email containing a link to submit their rates, which flow back into MyTruckload. After you pick a provider and tender the load, our system sends an email to allow the provider to accept or reject the tender.

Why Use MyTruckload?

- ✓ **Coordinate Multiple Modes of Shipping in One Place:** With MyCarrier, you have access all of your LTL, Volume LTL, and TL booking needs in one platform.
- ✓ **Add Your Preferred Incumbent Truckload Providers:** Seamlessly integrate with your preferred truckload providers, saving you time and money.
- ✓ **Quickly Create and Send Quote Requests:** Generate and send quote requests to multiple providers with just a few clicks.
- ✓ **Select and Tender Your Load:** With increased visibility into your truckload rates, you can easily identify the best provider for your needs.
